(54) Title: ISOLATED COMMUNICATION SAMPLE PROCESSING SYSTEM AND METHODS OF BIOLOGICAL SLIDE PROCESSING

(57) Abstract: A sample processing system (101) that may be automated and methods are disclosed where a number of sample processing systems (101), such as stainer, may be connected to a number of separate full function computers (181) through a stainer network (183) that may be isolated from other communication traffic. A network configuration may permit scalability and addressability so that additional sample processing systems (101), additional separate full function computers (181), and additional other devices such as label printers (200) may be easily added to the system. One or more remote information links (171) may be provided so that information transfer on a continuous or perhaps constant basis can be accommodated.

### INTERNATIONAL SEARCH REPORT

International application No.

PCT/US03/41022

Box I Observations where certain claims were found unsearchable (Continuation of Item 1 of first sheet)				
This	interna	tional report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:		
1.		Claim Nos.: because they relate to subject matter not required to be searched by this Authority, namely:		
2.	$\boxtimes$	Claim Nos.: because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically: there is no claim 196, present in the application		
3.	$\boxtimes$	Claim Nos.: 29-37, 65-66, 70-78, 90-92, 101-106, 108-119, 127-129, 138-143, 145-155, 162-189, 198-223 because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).		
Box	п Он	servations where unity of invention is lacking (Continuation of Item 2 of first sheet)		
This International Searching Authority found multiple inventions in this international application, as follows: Please See Continuation Sheet				
1.	$\boxtimes$	As all required additional search fees were timely paid by the applicant, this international search report covers all		
2.		searchable claims.  As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite		
3.		payment of any additional fee.  As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:		
4. , [		No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:		
Remar	rk on P	The additional search fees were accompanied by the applicant's protest.		
		No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT				
BOX II. OBSERVATIONS WHERE UNITY OF INVENTION IS LACKING  This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In order for all inventions to be examined, the appropriate additional examination fees must be paid.				
Group I, claim(s) 1-41, drawn to a method of automated sample processing.				
Group II, claim(s) 42-81, drawn to an automated sample processing system.				
Group III, claim(s) 83-223, drawn to a method of automated sample processing.				
The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not require the special technical feature of the Group II that is a first and second sample and a slide processing system.				
The inventions listed as Groups I and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group III does not require the special technical feature of the Group I that is a first and second stand alone processing systems.				
The inventions listed as Groups II and III do not relate to a single general inventive Rule 13.2, they lack the same or corresponding special technical features for the foliospecial technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first and second sample and a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Group II that is a first special technical feature of the Gro	lowing reasons: Group III does not require the
